A state society of the National Society of Professional Engineers

**1.0 NEW YORK PDH**

Presents

## **How to Avoid Premature Coating Failures**

with Regis Doucette, Regional Manager, Chlor\*Rid International

Chlor\*Rid conducts training sessions regarding soluble salts and surface preparation. These sessions are educational in nature and not sales oriented. We find ourselves in a unique situation where we have concentrated our R&D efforts in this specific area, and have learned a great deal of information we would like to share. People in our organization sit on several pertinent committees with industry leading organizations, such as NACE, ASTM, SSPC and ISO. Because our products, CHLOR\*RID and CHLOR\*TEST, cross over into almost every industry, we obtain information on how things are being done differently, specified differently and perform differently across industry lines.

We have developed this workshop focused on the most important portions of that information. The materials are under constant update as new information becomes available.

The major topics covered are:

- How are specifications changing to address soluble salts?
- What are soluble salts and where do they come from?
- How do they impact coating performance?
- How do you identify and test for them?
- How do you remove them?

6:30-7 PM Networking, 7-8 PM Seminar, Thursday, March 25, 2010, CSPE Office, Middletown.  
Registration: \$35 members, \$50 nonmembers

CSPE Sponsor: Trinkaus Engineering, LLC
